

It takes a world
to end violence against children

World Vision

World Vision Vanuatu is pleased to announce the launch of our four-year “**It Takes a World to End Violence Against Children**” program, which is part of World Vision International’s campaign to End Violence Against Children.

Our launching event will raise awareness around consent in relationships between young men and women in Vanuatu. We have a vision for young men and women coming to learn about the importance of consent in healthy relationships and feeling empowered to take a stand against sexual violence, to help create a safer Vanuatu.
