**1. Project title: “Strengthening capacity in the Energy, Agriculture, Forestry, and other Land-use Sectors for Enhanced Transparency in the Implementation and Monitoring of Vanuatu’s Nationally Determined Contribution”**

**2. Project description:** [Brief description of project, key activities and outputs, how will it be implemented?]

The Paris Agreement was adopted by consensus on 12 December 2015, during the 21st session of Conference of the Parties (COP 21) to the United Nations Framework Convention on Climate Change (UNFCCC) and entered into force on 4 November 2016. This landmark agreement aims to strengthen the global response to the threat of climate change and requires all Parties to establish robust measuring, reporting, and verification (MRV) systems and to communicate their efforts to UNFCCC. In this context, on 22-Jul-21, GEF approved a project identification form (PIF) and project preparation grant (PPG) submitted by FAO titled ‘Strengthening capacity in the Energy, Agriculture, Forestry, and other Land-use Sectors for Enhanced Transparency in the Implementation and Monitoring of Vanuatu’s Nationally Determined Contribution’.

The project aims to develop Vanuatu’s institutional and human capacities for complying with Enhanced Transparency Framework (ETF) reporting requirements of the Paris Agreement, and implementation and monitoring of Vanuatu’s Nationally Determined Contribution focusing on Energy, Agriculture, Forestry and other Land-use Sectors. With the MOCC Department of Environment Protection and Conservation (DEPC) of Vanuatu & Department of Climate Change as executing partner, and CBIT as resource partner, the GEF-7 has entrusted FAO for the preparation and implementation of the project.

The project will be executed under the following components and outcomes:

**Project Component 1: Strengthening Vanuatu’s institutional arrangements for a robust MRV system for NDC climate change mitigation and adaptation actions.**

**Outcomes of Project Component 1:**

- 1.1 NDC transparency system in place following the UNFCCC modalities, procedures, and guidelines.
- 1.2 Key Ministries, Agencies, Departments, and other stakeholder’s capacity strengthened to track the NDC actions.

**Outputs of Project Component 1:**

- 1.1.1 Institutional arrangements strengthened.
- 1.1.2. Sectoral transparency guidelines and protocols are established for enhanced NDC climate change mitigation, adaptation, and addressing L&D for observed and potential climate change impacts (e.g. extreme weather events and slow onset events).
- 1.1.3 Established operational quality control and assurance mechanism.
- 1.2.1 Strengthened guidelines on monitoring and reporting of climate financing focusing on domestic and international sources, and both public and private sector.
- 1.2.2 Strengthened capacity of national climate changes stakeholders to track the enhanced NDC adaptation actions.

**Project Component 2: Provision of an online platform, tools, and training for a robust MRV system focusing on Energy, Agriculture, Forestry, and other Land-use Sectors.**

**Outcomes of Project Component 2:**

- 2.1 Operational digital data integration and sharing system for a robust MRV system hosted by DEPC.

**Outputs of Project Component 2:**

- 2.1.1 Upgraded Information Technology (IT) system for a robust MRV system hosted by MOCC based on the existing system.
- 2.1.2 Strengthened human capacity on GHG emissions and removal tools, and climate vulnerability assessment through training and peer to peer learning.

The project will be implemented by FAO and executed by the Ministry of Climate Change and the Ministry of Agriculture (MALFFB).

**19. Project rationale:** [What is the rationale for the project? What is its strategic context? What is the primary need, and how was it identified? Is this program building on any previous activities, projects or policy?]

The project aims to develop Vanuatu’s institutional and human capacities for complying with Enhanced Transparency Framework (ETF) reporting requirements of the Paris Agreement, and implementation and monitoring of Vanuatu’s Nationally Determined Contribution focusing on Energy, Agriculture, Forestry and other Land-use Sectors. With the MOCC Department of Environment Protection and Conservation (DEPC) of Vanuatu & Department of Climate Change as executing partner, and CBIT as resource partner, the GEF-7 has entrusted FAO for the preparation and implementation of the project

**20. Project objective against the baseline:** [What is the objective of the project? Describe the baseline scenario (i.e. emissions baseline, climate vulnerability baseline, key barriers, challenges and/or policies) and the outcomes and the impact that the project will aim to achieve in improving the baseline scenario. Refer to the logical framework and theory of change template below]

To develop Vanuatu’s institutional and human capacities for complying with Enhanced Transparency Framework (ETF) reporting requirements of the Paris Agreement, and implementation and monitoring of Vanuatu’s Nationally Determined Contribution focusing on Energy, Agriculture, Forestry and other Land-use Sectors.

**21. Policy coherence and alignment:** [provide details as to how the project aligns with the National Sustainable Development Plan (pillar, goal and objective), the Climate Change and Disaster Risk Reduction Policy, and other policies, plans, strategies and priorities]

**22. Current status:** *[progress to date and current activities]*

Project document/proposal has been submitted for approval.

**23. Market overview:** *[If the project involves a particular market describe the products or services including the historical data and forecasts. If applicable, provide the key competitors with market shares and customer base. Also provide, if any, pricing structures, price controls, subsidies available and government involvement.]*

The project will not involve development commodity products.

**24. Implementing / executing entity background / justification:** *[Quality of the management team, overall strategy, financial profile, equity investment, management, operations, production and marketing]*

FAO – The Food and Agriculture Organization of the United Nations (FAO) have been working in Vanuatu for several decades, implementing programmes in areas of food (Sectors under MALFFB), implemented Country Programme Framework (CPF) for Vanuatu through Technical Cooperation (TCPs) and projects. Recently FAO has moved into the biodiversity conservation and restoration and climate change, in which it has implements (ed) GEF 4, GEF 5 and GEF 6 in Vanuatu, with the Department of Environment Protection and Conservation. This project is the first in which FAO will be implementing a climate change project in Vanuatu through the Department of Climate Change.

FAO in the past three years have secured a number of projects for Vanuatu, some currently implemented as well others in the process of approval. FAO have also grown in national work force, from one person (Vanuatu FAO rep) in 2018 to 15 in 2022 through project personnel. FAO therefore has the capacity to continue to assist Vanuatu secure and implement projects.

Other partners of the CBIT project are Ministries for the Government of Vanuatu.

**25. Institutional / implementation arrangements:** *[Governance structure of the project, organisation structure, roles and responsibilities of the project management unit, steering committee, executing entities and flow of funds structure. construction and supervision methodology with key contractual agreements, operational arrangements with key contractual agreements following the completion of construction]*

FAO will be the implementing Agency for the project, while the Government of Vanuatu will be the executing agencies, executing specific activities of the project. A Project Management/Steering Community for the project will be instituted, comprising of the Directors of Government Departments directly involved in the project. Project funds will be managed by FAO and will be delivered to executing agencies either through Letters of Agreements or direct procurement. The overall management of the project will be under the FAO PMU.

**26. Results Areas** *[GCF projects only]*

Reduced emissions from (mitigation):	Increased resilience of (adaptation):
<input type="checkbox"/> Energy access and power generation	<input type="checkbox"/> Most vulnerable people and communities
<input type="checkbox"/> Low emission transport	<input type="checkbox"/> Health/well-being, & food/water security
<input type="checkbox"/> Buildings, cities, industries & appliances	<input type="checkbox"/> Infrastructure and built environment
<input type="checkbox"/> Forestry and land use	<input type="checkbox"/> Ecosystems and ecosystem services

**27. Expected performance against investment criteria** *[GCF projects only] [brief description]*

**a) Impact Potential:** *[Potential of the project to contribute to the achievement of the GCF's objectives and result areas]*

**b) Paradigm Shift Potential:** *[Degree to which the proposed activity can catalyse impact beyond a one-off project investment]*

**c) Sustainable Development Potential:** *[Environmental, social and economic co-benefits, including gender-sensitive development impact]*

**d) Needs of the Recipient:** *[Vulnerability and financing needs of the beneficiary country and population]*

*[Information provided on this form will be made publicly available unless otherwise agreed with the NAB Secretariat]*

<p><b>e) Country Ownership:</b> <i>[Beneficiary country's ownership of, and capacity to implement, a funded project]</i></p> <p><b>f) Efficiency and Effectiveness:</b> <i>[Economic and financial soundness of the project]</i></p>												
<p><b>28. Consultation</b> <i>[Specify the plan for multi-stakeholder engagement, and what is been done so far in this regard, e.g. National, Provincial, Community, Civil Society, Private Sector]</i></p> <p>Consultations on the project has been completed. This was done through an inception workshop in 2021, followed by one-on-one consultations with Government, private sector, NGOs and civil society. This was followed by the validation workshop in early 2022. All workshops were held in Port Vila.</p>												
<p><b>29. Potential overlaps / duplication to be resolved:</b> <i>[What related projects are being undertaken in the area?]</i></p> <p>The project will not come into overlap or duplicate any of existing programs.</p>												
<p><b>30. Technical feasibility/evaluation:</b> <i>[Brief summary of technical feasibility of project. Will the project fund local staff? If so, where? Are there additional staff required (e.g. counterparts, proposed T/A Positions)? TOR must be included for all T/A positions.]</i></p> <p>The project is technically feasible, aiming at Strengthening capacity in the Energy, Agriculture, Forestry, and other Land-use Sectors for Enhanced Transparency in the Implementation and Monitoring of Vanuatu's Nationally Determined Contribution. The project will be hiring a National Project Coordinator to coordinate the project.</p>												
<p><b>31. Economic and financial analysis/viability:</b> <i>[Brief summary of the economic and financial viability of the project]</i></p> <p>The project will be financed by the Capacity Building Initiative for Transparency, under the Paris Agreement.</p>												
<p><b>32. Financial management and procurement:</b> <i>[Describe the project's financial management and procurement, including financial accounting, disbursement methods and auditing]</i></p> <p>The project funds will be managed by FAO, and procurements will be made directly by FAO or by the executing agencies under LoAs.</p>												
<p><b>33. Environmental and social considerations:</b> <i>[e.g. environmental and social impact safeguards / assessments, vulnerability framework]</i></p> <p>The project will not have any negative environmental and social impacts, but it will improve knowledge in these areas.</p>												
<p><b>34. Gender and social inclusion considerations:</b> <i>[e.g. gender, disability, indigenous concerns, assessment of any benefits from project to women, youth, children and vulnerable groups]</i></p> <p>Gender sensitive considerations have been included in the project. The two paragraphs below are activities from the project;</p> <p><i>Activity 1.2.2.2 Designing and implementing a gender-sensitive training program involving relevant institutions at different levels to monitor enhanced NDC priority adaptation actions.</i></p> <p><i>Activity 2.1.2.1 Designing and implementation of gender-sensitive training on data collection, storage, and management; GHG emission and removal estimation and reporting; and transparency elements.</i></p>												
<p><b>35. Monitoring, reporting and evaluation:</b> <i>[How will the project be monitored and evaluated? Provide project specific institutional and implementation arrangements for monitoring, reporting and evaluation. Provide methodologies for monitoring and reporting of the key outcomes of the project]</i></p> <p>The FAO Monitoring and Evaluation Specialist will be developing the M&amp;E framework for the project.</p>												
<p><b>36. Sustainability measures:</b> <i>[Exit strategy/ how will the project be sustained after project funding? What is the Vanuatu Government funding source? What is the future maintenance requirement? What are the future recurrent cost implications for the Government?]</i></p> <p>The project aims mainly at building the capacity for NDC. Once the system is established then Vanuatu can continue to use the system for future reporting.</p>
